

What Makes a Scientific Question Succeed?

Predicting Future Attention, Resolution, and Premise Revision
from Question Structure and Evidence Context

Author

Hui Mao

Independent Researcher

Present address: Trine University, United States of America

ORCID: [0009-0006-7249-4240](https://orcid.org/0009-0006-7249-4240)

Acknowledgements

This work uses the public arXiv metadata record, and the author thanks arXiv and Cornell University for maintaining open access to it. The author also thanks the maintainers of the open-source scientific Python ecosystem (NumPy, pandas, scikit-learn, statsmodels, Matplotlib), on which the entire analysis pipeline is built.

Funding

This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

Declaration of competing interests

The author declares no competing interests.

Data availability

All data, code, outcome labels, and judge rationales are publicly available.
